

myDataSIM tariff overview

The SIM card is preconfigured, tested and delivered integrated in the instrument. All you need to do is switch-on the measurement instrument and you can immediately start collecting data. With national roaming, improved network coverage is possible. The device can select between the available networks and is not tied to one network.

One-time activation fee: 25,00 Euro
SMS Priority: 0,50 Euro / SMS

The data volumes as well as the consumption fees per device are calculated according to your requirements and the specific data block rounding. Please use the myDatanet calculation tool for the data volume: support.mydatanet.at/battery lifespan
